## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8, 10-12, 14-16, 22-24, and 26 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Palermo 6,139,510, as applied in the previous Office Action.

Palermo is as set forth in the previous Office Action. Regarding the limitation that the etched surface includes oxygen-containing organic groups formed at position at which fluorine atoms have been removed, it is the examiner's position that the etched hydrocarbonaceous surfaces are substantially similar to those contemplated by applicants. Accordingly, in the absence of factual evidence to the contrary, the examiner has reason to believe that etched carbonaceous surfaces of the prior art includes oxygen-containing organic groups formed at positions at which fluorine atoms have been removed. Applicants are invited to provide such evidence.

Applicants argue that Palermo only discloses deposition specifically of a hydrocarbonaceous residue as a result of use of a plasma stream of an alkane, not a fluorocarbon.

In this concern, it should be noted that Palermo teaches "fluorocarbons" such as tetrafluoroethylene and trichlorofluoroethylene.

Accordingly, the examiner's position remains that the teachings of Palermo anticipate or in the alternative, render obvious the invention as claimed in present claims 1-8, 10-12, 14-16, 22-24, and 26.

#### ***Response to Arguments***

4. Applicant's arguments filed December 28, 2006 have been fully considered but they are not persuasive.

#### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1774

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
